Election/Restrictions

Restriction to one of the following inventions is requirement under 35 U.S.C. 121:

I. Claims 116-139, drawn to providing a first portable storage medium, the first portable storage medium including first fixed content and computer executable software; wherein when the first portable storage medium is used at the user station, *the computer executable software can be installed on the user station to (i) enable a user at the user station to access first remote content from a first remote content source, the first remote content relating to the first fixed content and (ii) enable the use to access second remote content from a second remote content source, the second remote content relating to second fixed content, the second fixed content being different from the first fixed content, and the second fixed content being included on a second portable storage, classified in class 709, subclass 201.*

II. Claims 140-151, drawn to processor executes the programmed logic to enable a user at the user station to access, via the user interface, fixed content from each of a plurality of portable storage media together with respective remote content from one or more remote content sources, and wherein, for each of the plurality of portage storage media, the user interface is customized with respect to the fixed content stored on the

portable storage medium when the user access the fixed content stored on the storage medium, classified in class 709, subclass 219.

III. Claims 152-175, drawn to Internet via a server-based update distribution service, providing on a first portable storage medium a first computer executable software application that can be executed on the client computer; and providing on the first portable storage medium computer executable software that can be transferred to the client computer to (i) *enable the client computer to obtain over the Internet via the server-based update distribution service an update for the first computer executable software application, the update for the first computer executable software application being selected at the client computer, and (ii) enable the client computer to obtain over the Internet via the server-based update distribution service an update for a second computer executable software application on the client computer, the second computer executable software application being different from the first computer executable software application, and the update for the second computer executable software application being selected at the client computer, classified in class 707, subclass 203 or class 709, subclass 203.*

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility such as *"via the user interface, fixed content from each of a plurality of portable storage media together with respective remote content from one or more remote content*
